After years spent toiling away in the bowels of the wine industrial complex, we escaped in 2007 with our love of wine still intact. We saw 'how the sausage was made' at the giant corporations - in the cellars, streets, and the boardrooms. Our goal has been to make honest, affordable wines without the industrial trickery needed to make millions of cases. Wine is crafted from grape to glass, true to varietal character, and expressive of California's bold style. It's a cure for industrial wines...and we took on an ALIAS just in case the corporate powers came after us.
